| <b>Name</b>                               |             | <b>Date</b>   |

### Outlet Stabilization Support Project – Guidelines and Information

- Support is offered for the installation of additional sediment mitigation and/or stabilization to outlets of soil conservation structures or stabilized concentrated flows within 200 metres of a watercourse or wetland.
- Funding for eligible costs on approved projects rebated at 100% - to a maximum of \$5000.00/project.
- Applicants must seek the advice of a soil & water engineer for the proper design and sizing of the outlet stabilization
- All project work must be completed by September 15th
- Please visit <https://peiawp.com> for complete program guidelines
